MORE THAN DIGITAL SIGNAGE

LED TV & ORIGINAL
FRAME & ART WITH
SALE

Industrial TV

Led TV
android TV 42"

Do NFTs only belong to the digital World? Or an artwork in real life can only be precious when it is in the real world? Think differently, get beyond the limits of others. This is not plugging a flash disk into the screen. This make the screen an NFT artifact! Uniqueness is the key and we make it happen through minting both the screen and the NFT together. In this way, NFT works can be exhibited at home, in the office or in art galleries. Octopus Signage software technology lets us to lock the screen with the NFT. And thanks to Octopus Smart Contract everything is on-chain. Including the screen's mac address So we provide uniqueness both in the digital and the real world
